|                   |                                |
|-------------------|--------------------------------|
| Buyer problem     | product_demo_and_stock_inquiry |
| Required products | Samsung_QL4B_monitor           |
| Quantities        | -                              |
| Timeline          | immediate_demo_booking         |
| Budget            | -                              |
| Delivery location | -                              |

## Recommended Solution

| Requested            | Recommended            | Qty | Rationale                  |
|----------------------|------------------------|-----|----------------------------|
| Samsung_QL4B_monitor | Manual review required | -   | no_confident_catalog_match |

## Risk, Validation, and Decision Support

|                          |                        |
|--------------------------|------------------------|
| Prediction provider      | local_tabular_baseline |
| Win probability          | 28%                    |
| Pricing risk             | medium                 |
| Missing requirement risk | 18%                    |
| Recommended discount     | 0.0%                   |

## Validation Checklist

|          |                                                                         |
|----------|-------------------------------------------------------------------------|
| Status   | blocked                                                                 |
| Blockers | No catalog match for: Samsung_QL4B_monitor, No quote draft was created. |
| Warnings | Missing requirement field: delivery_location                            |

## Assumptions and Next Steps

- Some requirement fields are missing; proposal should remain draft until clarified.
- No confident catalog match found; manual solution review required.
- Review the technical and commercial assumptions.
- Confirm missing requirement fields before final submission.
- Approve the proposal for dispatch.
